PRODUCT CERTIFICATION: Flint Group Printing Blankets – TSCA Compliance

REF# ASTH-CWAKLB KBA (UK) Ltd

PRODUCTS: All Flint Group blankets

Flint Group submits this letter to address the requested certification for non-printing ink or coating products.

U.S. Toxic Substances Control Act (TSCA)

EPA initiated the Final Rule of the implementation of the TSCA inventory reset, more formally known as the "TSCA inventory Notification (Active – Inactive) Requirements Rule in 2019. Based on information available to us from our raw material suppliers and the known product composition, we confirm that all of the chemical substances imported or used in our manufacturing processes within the US are listed on the Active Inventory, exempt or otherwise managed in accordance with the U.S. Toxic Substance Control Act.

The blankets and bars manufactured by Flint Group are "articles" rather than chemicals. When used as intended, these blankets and bars are unlikely to release chemicals at levels that would negatively impact your printed products.

It is important to recognize that many substances are ubiquitous; the observance of all these substances at or below trace levels is not part of our ongoing production control. The information utilized in this evaluation has been collected from raw material suppliers via Flint Group's regulatory compliance program; no analytical testing has been conducted. We believe this information to be true & accurate as of this date.

Thank you for your continued interest in Flint Group products and services. If you have any questions or concerns please contact me.

Respectfully,

A handwritten signature in black ink that reads "Tony Ellis".
